

3.1. Creation of a catalogue of agrifood research groups

With the aim to determine the research potential of the ceiA3 and its capacity to meet the needs of agrifood enterprises, A catalogue has been published listing the agrifood research groups of the ceiA3. These groups belong to the five universities that make up the consortium as well as the centres of the CSIC and the IFAPA. The groups have been assigned to 16 clearly-defined thematic research lines.
