

3.2. Foment collaboration and internationalization of *ceiA3* research groups

Incentives have been established to promote collaboration between the research groups of the *ceiA3* and between these groups and foreign research groups. Collaboration will be measured according to number of publications each year and the evolution of publications. The results for 2010 show a **XX% and YY%** increase in both indicators over 2009.

For this action, a list of publications made in the sector has been drawn up for 2010. The list includes publications by two or more research groups of the *ceiA3*, and *ceiA3* groups in collaboration with foreign research groups. The groups that meet the requirements of this action receive an incentive according to the total number of publications made and the funding available for the action out of a total allocation of €500,000.
