

### **3.3. Mobility programme for young postdocs to engage in stays at renowned research institutes abroad**

This program pretends to foment the training, recruitment and stable employment of highly qualified postdocs. The action involves the recruitment and provision of stable employment for national talent so that young people can further their studies at renowned institutions abroad and be subsequently reincorporated into a research group in Spain for at least one year.

This will permit Spanish society to obtain a “return” on the investment made in training these PhD holders.

Eight contracts have been offered to postdocs to engage in postdoctoral research stays for two years in a prestigious research centre abroad in the agrifood field, followed by reinstatement for a period of one year in a ceiA3 research group.

The awarding of a contract by the receiving institutions (ceiA3 universities, research institutes of the CSIC and the IFAPA participating in the project) does not entail a commitment by the institutions to hire the candidate on a permanent basis.

A total of €856,800 have been allocated for this action. The action will have a duration of 3 years.
