

3.7. Participation in international forums

€100,000 has been allocated to attend and participate in international forums in the agrifood sector.

The *ceiA3* recently participated in the International Food Fair of Lisbon in March 2011 in the FOOD I&DT pavillion organized by INOVISA (science and technology park of the Higher Institute of Agronomy-UTL). A brokerage was held during the event to offer technological support to companies and research centres. As a result, a dozen agreements were reached and contacts made between public and private institutions of Portugal and research groups of the *ceiA3*.
